

**800 SERIES**

A WHOLE NEW POINT OF VIEW.

**It's more than a window. It's a whole new point of view.** At Ply Gem Windows, we have a different view for the way the window business should be run. We believe you should have access to all of the top quality styles and brands across the country. That's why we've taken our entire portfolio of brands, brands that you know and trust, and given them one name – Ply Gem Windows. With this one name comes a lot of big advantages, starting with a national manufacturing and distribution network. Pair that with our commitment to customer service, sustainable practices and wide variety of window styles that fit all of your design needs, and you'll get the right window for every project and every budget.

And, because we're part of the Ply Gem family, you know you'll always have access to leading brands. Windows, doors, siding and accessories, stone veneer, fence and rail, rainware, shutters and designer accents, we have something for every project. We work with residential builders, remodelers, architects, distributors and dealers to help build sales. When you combine over 50 years of experience, industry-leading customer service, and trusted local relationships you've got a company you can count on. **Ply Gem. Building products. Building success.**

**Uncompromising quality. Superior value.** There's one clear choice when it comes to finding the quality and value you want in windows – Ply Gem Windows Pro Series. Our distinct product offerings provide you with the selection and craftsmanship you need to bring your next project to life. Our windows are designed to meet every need and every budget. Plus, with our service and support you'll be able to get the job done right the first time, every time.

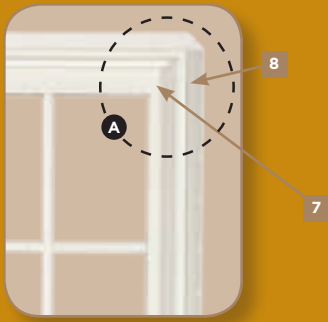

A WHOLE NEW POINT OF VIEW.

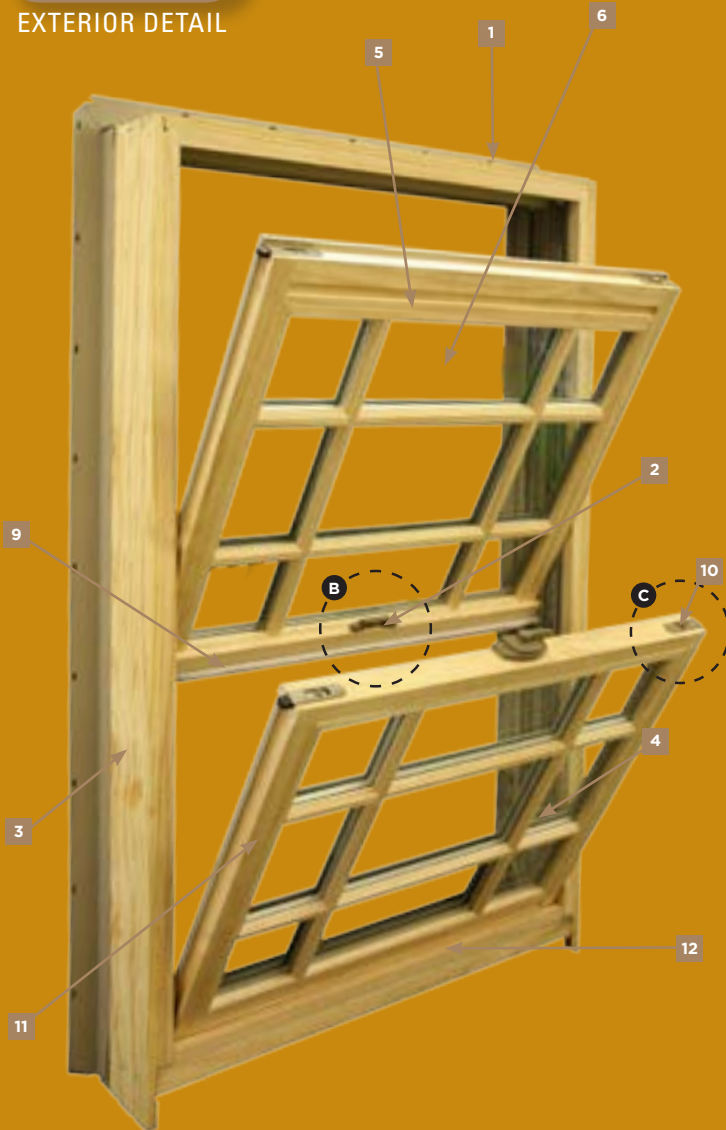

## 800 DOUBLE HUNG

**PRO SERIES 800 DOUBLE HUNG** vinyl-clad wood windows make finding the right style and shape simple. They feature natural wood or pre-finished white interiors and are available in singles, twins, combinations, 30° and 45° angle bays, fixed and a variety of architectural shapes.

EXTERIOR DETAIL

Note: Standard performance shown

## FEATURES

- 1 Extruded pre-punched nailing fin with corner gasket for simple installation
- 2 Cam lock provides security and enhanced performance
- 3 4 9/16" jamb eliminate extensive drywall work
- 4 Both sash tilt in and remove for safe and easy cleaning of exterior glass
- 5 Profiled glazing bead in natural clear wood or cellular PVC for prefinished white to accentuate interior trim
- 6 Energy-efficient Warm Edge insulating glass, standard; optional upgrades include: Warm Edge+, Low-E, HP or HP2+ glass package options (see pages 18 & 19 for specific glass package options and descriptions)
- 7 Rigid form-fitting vinyl cladding on sash and frame, fully welded at top two corners of frame for maximum protection against the elements
- 8 Integral exterior face groove allows for easy mulling
- 9 Weatherstripping on the bottom of each sash and on the window opening form a perimeter seal creating an air and water barrier
- 10 Convenient Easy-Tilt one touch tilt latch makes tilting in sash effortless
- 11 Select clear wood interior ready for paint or stain to match any décor, also available in pre-finished white
- 12 Recessed full-width finger pulls in top and bottom sash for easy operation

Get more beauty for your buck with our 800 double hung units. They come standard with a convenient Easy-Tilt sash system that makes cleaning and maintaining simple. The interior glazed sash design creates shadow lines to help enhance the look and give more curb appeal. Plus, they're available in a variety of grille options including simulated-divided-lite (SDL), grilles-between-the-glass or wood grilles. Each option delivers a traditional look that increases the beauty and enhances the value of your home. Available in white and sandalwood exterior cladding options.

**A** Rigid form-fitting vinyl cladding on sash and frame, fully welded at top two corners of frame for maximum protection against the elements

**B** Cam lock provides security and enhanced performance

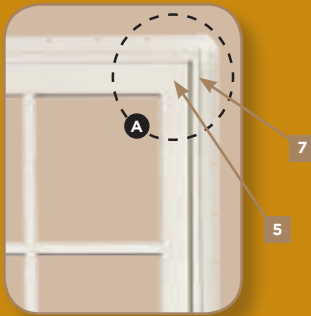

**C** Convenient Easy-Tilt one touch tilt latch for easy tilt-in

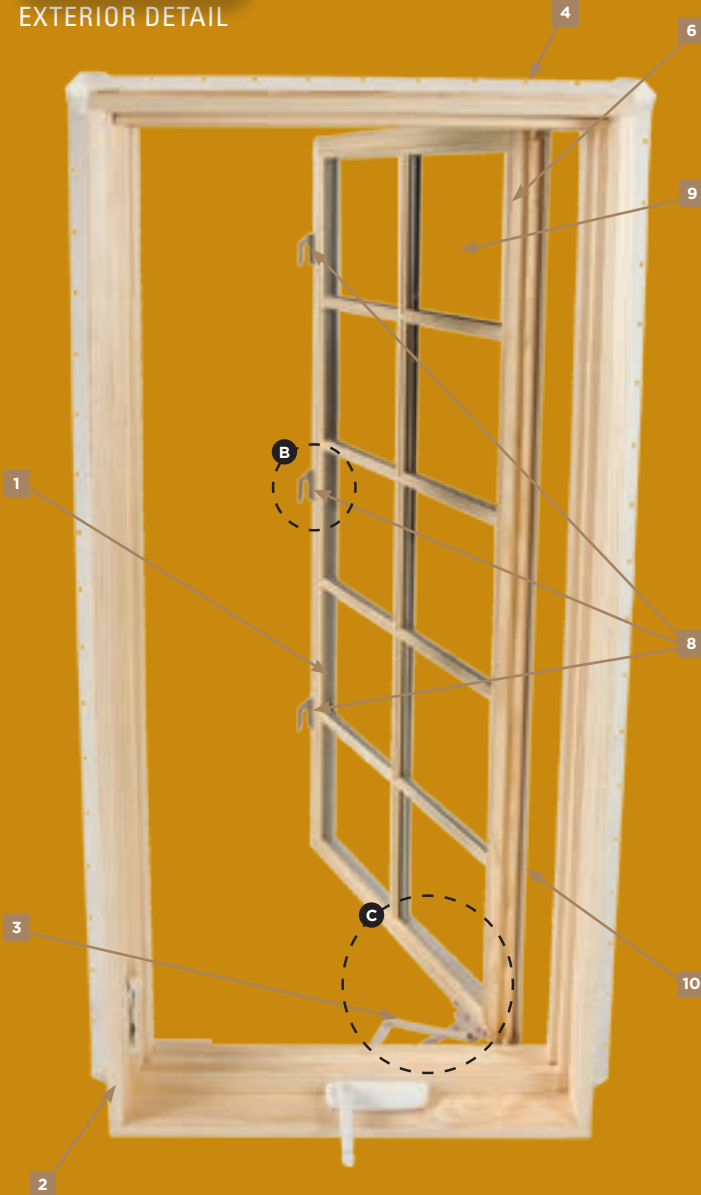

## 800 CASEMENT & AWNING

**PRO SERIES 800 CASEMENT & AWNING** vinyl-clad wood windows are designed around your needs. They are available in singles, twins, triples, quads, combinations, 30° and 45° angle bays, bows and a wide selection of architectural shapes.

EXTERIOR DETAIL

## FEATURES

- 1 Profiled glazing bead in natural clear wood or cellular PVC for prefinished white to accentuate interior trim
- 2 4 9/16" jamb made of clear wood eliminate extensive drywall work
- 3 Smooth-functioning operating hardware, concealed for a clean appearance and allowing sash to open a full 90°
- 4 Extruded pre-punched nailing fin for simple and accurate installation
- 5 Rigid form-fitting vinyl cladding on sash and frame, fully welded at all four corners for maximum protection against the elements
- 6 Sash and interior made with select clear wood ready for paint or stain to match any interior décor, also available in pre-finished white
- 7 Integral face groove allows for easy mulling
- 8 Concealed multi-point locking system enhances weather performance and security
- 9 Energy-efficient Warm Edge insulating glass, standard; optional upgrades include: Warm Edge+, Low-E, HP or HP2+ glass package options (see pages 18 & 19 for specific glass package options and descriptions)
- 10 Leaf weatherstripping on sash and bulb weatherstripping on frame for air-tight performance and smooth operation

Bring the beauty and value home with our 800 casement & awning windows. They feature an interior glazed sash to enhance your home's appearance and a weather-resistant stainless steel hinge track and adjustable hinge to ensure superior performance. They're available in a variety of grille options including simulated-divided-lite (SDL), grilles-between-the-glass or wood grilles to help you find a look that matches your home's style. The sash opens a full 90° for simple cleaning. Available in white and sandalwood exterior cladding options.

**A** Rigid form-fitting vinyl cladding on sash and frame, fully welded at all four corners for maximum protection against the elements

**B** Concealed multi-point locking system enhances weather performance and security

**C** Smooth-functioning operating hardware, concealed for a clean appearance and allowing sash to open beyond a full 90°

## 800 SLIDING PATIO DOOR

**PRO SERIES 800 SLIDING PATIO DOORS** unlock a world of stylish possibilities. They are available with matching fixed panels, transoms, segmented transoms, circle heads and a wide variety of architectural shapes.

EXTERIOR DETAIL

## FEATURES

- 1 4 9/16" jambs eliminate extensive drywall work
- 2 Composite sill combines wood, aluminum and vinyl for enhanced durability
- 3 Adjustable rollers ensure smooth operation
- 4 Natural wood interior ready for paint or stain to match any interior décor
- 5 Pre-punched nailing fin with corner gasket for simple installation
- 6 Rigid form-fitting vinyl cladding on door and frame for maximum protection against the elements
- 7 Energy-efficient Warm Edge insulating tempered glass, standard; optional upgrades include Low-E or HP glass package (see pages 18 & 19 for specific glass package options and descriptions)
- 8 Choice of handle set in white, sandalwood or oil-rubbed bronze
- 9 Full-perimeter weatherstripping for air-tight performance and smooth operation

Looking for more style and more value? Look no further than our 800 sliding doors. They are constructed with full-perimeter weatherstripping for a tight and consistent seal. They're available in a variety of grille options including simulated-divided-lite (SDL), grilles-between-the-glass or wood grilles for a traditional look that fits your home and your style. Choose from a keyed, single point-lock exterior handle available in white, sandalwood or taupe. Then, choose from white and sandalwood low-maintenance, clad exterior options. Standard sliding patio doors include a solid bright brass interior handle and a security foot bolt.

Adjustable rollers ensure smooth operation

Composite sill combines wood, aluminum and vinyl for enhanced durability

Handle sets available in white, sandalwood and oil-rubbed bronze

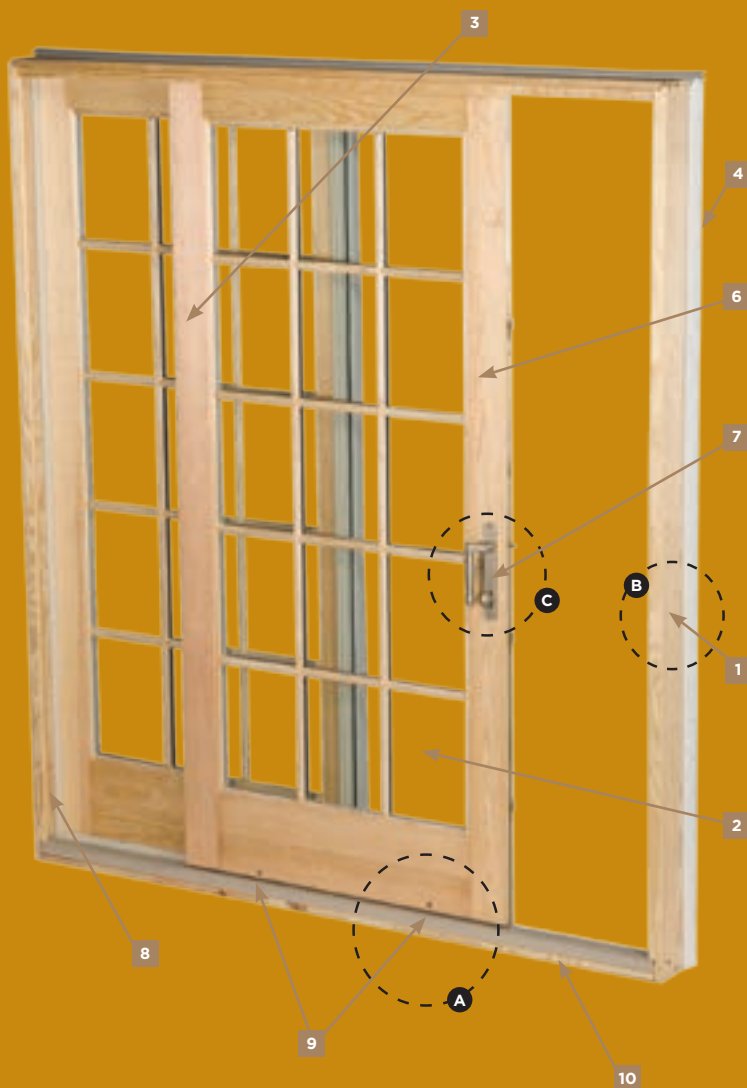

## 800 FRENCH SLIDING PATIO DOOR

**PRO SERIES 800 FRENCH SLIDING PATIO DOORS** help you bring your vision to life. They are available with matching fixed panels, transoms, segmented transoms and wide selection of architectural shapes.

All units are NAMI certified and rated in accordance with NFRC 100/200 standards by an AAMA accredited lab. Performance values reflect the performance of units tested with the following configuration: 3mm glass, no grilles and IGU thickness specified in the chart.

R VALUE: Restrictive ambient air flow  
 U FACTOR: Rate of heat loss  
 SHGC: Solar Heat Gain Coefficient  
 VT: Visible Transmittance

## PERFORMANCE COMPARISON

The lower the U-Factor, the greater the insulation value. R-Value is the inverse ( $R=1/U$ ) of the U-Factor. Total Unit Factors determined per NFRC-100 (National Fenestration Rating Council). Chart shows relationship between performance and Ply Gem Windows glass package options.

## LOW-E GLASS PACKAGES

Our Low-E glass packages combine Low-E and Warm Edge spacer options, providing insulating glass options to meet your specific needs. Our Low-E glass packages provide better performance in regions with hot summers and cold winters. Our Low-E<sup>SC</sup> (solar cooling) glass packages are optimized for regions with significant indoor cooling and glare reduction requirements. Our Low-E glass packages can be combined with capillary tubes to address performance needs in high altitude applications.

**Low-E** — One lite of Low-E

**Low-E<sup>SC</sup>** — One lite of solar cooling Low-E

**Low-E2<sup>+</sup>** — One lite of Low-E and one lite of Interior Surface Low-E

**Low-E2<sup>SC+</sup>** — One lite of solar cooling Low-E and one lite of Interior Surface Low-E

<sup>†</sup> These glass packages are combined with capillary tubes to address performance needs in high altitude applications.

## HP GLASS PACKAGES

Our HP glass packages combine Low-E with argon gas fill and Warm Edge spacer options, providing high-performance insulating glass options to meet your specific needs. Argon is a safe, odorless, colorless gas, which is heavier or denser than air. When used in conjunction with Low-E glass, argon provides better insulation. That's because heat and cold do not pass through argon gas as easily as through air. Argon is nontoxic and presents no human health or environmental concerns. HP glass packages are also available in solar cooling (<sup>SC</sup>) glass packages for regions with significant indoor cooling and glare reduction requirements.

**HP** — One lite of Low-E and argon gas fill

**HP<sup>SC</sup>** — One lite of solar cooling optimized Low-E and argon gas fill

**HP2<sup>+</sup>** — One lite of Low-E and one lite of Interior Surface Low-E with argon gas fill

**HP2<sup>SC+</sup>** — One lite of solar cooling optimized Low-E and one lite of Interior Surface Low-E with argon gas fill

## WHAT IS LOW-E?

Low-E glass has a secondary, very thin metallic dual layer coating. This allows the sun's heat and light to pass through the insulating glass, but, at the same time, actually works to reflect radiant heat back toward its source. Since Low-E coating reflects radiant heat waves, it helps keep your home warmer in the winter by trapping radiant heat and cooler in the summer by blocking it from your home. Low-E<sup>SC</sup> is optimized for warmer climates by applying two heavier layers, through a patented process, resulting in blocking 73% of the sun's radiant heat from entering your home while providing superior insulation in cooler weather to save you energy year-round.

Our *Interior Surface Low-E* is engineered to have the characteristic window manufacturers and homeowners need most — lower U-Factor— and is applied to the surface of the glass you can touch inside your home, providing increased comfort and improved energy savings. One major benefit is a decrease in U-Factor of approximately 0.04, improving the energy efficiency so that many of our doors and windows meet new energy codes and ENERGY STAR® zone requirements. The neutral color with low haze and ultra-smooth surface of our Interior Surface Low-E provides a clearer view of the outdoors and can be cleaned with common household glass cleaners. No special instructions. Our Interior Surface Low-E is durable and scratch-resistant.

### NATURAL LIGHT WITHOUT THE GLARE.

Ply Gem's Low-E glass has many advantages such as minimal visible darkening. Our glass minimizes interior glare, reducing eyestrain and making it easier to watch television or look at a computer screen when bright sunlight fills a room.

NOTE: See page 19 for explanation of glass packages. Contact your Ply Gem Windows sales representative for a full list of Pro 800 Series glass thickness options and ratings.

## SCREENS

Pro 800 Series screens feature white aluminum frames with fiberglass mesh. Screens for single hung units are half-length while screens for double hung, casement, awning and slider windows are full-length. Sliding patio door screens are full-length and feature steel rollers for ease of operation.

## ENERGY STAR®

Ply Gem Pro 800 Series windows and patio doors can be configured to meet ENERGY STAR zones in all states. Your investment in ENERGY STAR products will pay for itself over time in reduced energy bills, as well as increase the comfort level inside your home.

**PLY GEM PRO 800 SERIES WINDOWS HAVE BEEN GREEN APPROVED BY THE NAHB RESEARCH CENTER.**

This means you can be assured that Ply Gem Pro 800 Series windows comply with specific green practice criteria in the National Green Building Standard. Visit [www.GreenApprovedProducts.com](http://www.GreenApprovedProducts.com) for more details.
